Garden Wedding is Pretty College Affair

Sunday afternoon in the pictureque gardens of the Alpha Phi Alpha sorority home a colorful wedding was solemnized when Miss Leola Johnson became the bride of Donald E. Faber of Ashland. The impressive ring ceremony was read by Dr. Grever C. Birches.

The bridal party took its place to the strains of the wedding march of Lohengrin. Dr. Birches entered the garden followed by the groom attended by his brother, Everett Faber, and together they waited at the altar which was a bower of blossoming roses. An arch of ribbons and flowers at one side of the garden served as an entrance for the bride and her attendants.

Sixty sisters of the bride entered the garden through the arch and made a ribbon aisle through which the bridal party passed.

Miss Eleanor Yarnd, bridesmaid, entered first. She wore a gown of Alabamian satin with a lace collar and a ruffled skirt and neckline.

She carried an arm bouquet of pink roses, delphinium and sweet peas.

She was followed by Donnie and Patsey Faber, as ring bearer and flower girls.

The bride entered on the arm of her uncle, Barkley A. Newman, following the ring bearer and flower girl. She wore a gown of peach colored organza with a decorative belt with black and white embroidery.

She carried a bouquet of Taliann roses and old ivory sweet peas. She wore a hat formed by two crossed bands of natural straw with bows held in place in front of each side.

preceding the wedding march Linden R. Laufer of Albany sang "Utilly and Miss Bernice Rickman sang "At Dawn". Following the ceremony the bridal party made their way to the streets of Champion for the reception.

Miss Ruth Schreiber marched with the marchers.

Other girls included Miss Vernita Van Pelt, Mrs. Pauline Johnson, Carolyn Schneider, Miss Margaret Morris, Miss Mildred Drager, Miss Sheldon, Miss Dorothy McDonald, and Miss Sidney Hannaford.

A large number of relatives were present.

Receiving were Mr. and Mrs. Barkley A. Newman, Mr. and Mrs. G. E. Faber, Mr. and Mrs. Donald Faber, Mrs. W. V. Johnson, Miss Eleanor Yarnd, Miss Patsey Faber and Donnie and Patsey Faber.

Assisting in serving were Miss Lulu Allen, Miss Dorothy Rose, Miss Lulu Flannery and Miss Edythe Glazier.

Following the reception, Mr. and Mrs. Faber left for a visit with Mr. and Mrs. Johnson, father of the bride, at Calgary, Alberta. From there they will go to Chicago to visit the world's fair and then return to Ashland where Mr. Faber is athletic coach in the school there.

Mrs. Faber has been a prominent member of Wilmette university school life and is a member of Alpha Phi Alpha sorority. Mr. Faber graduated from Wilmette where he was associated with Alpha Psi Delta fraternity.

Tea Hostess

Mrs. Ray Warren was a tea hostess on Saturday June 24 in honor of Mrs. Martin Stetto's birthday. Those present were: Mrs. Martin Stetto, Mrs. F. Guttenberg, Mrs. Voisey, Mrs. O. Davis, Mrs. Louis Warren, Mrs. E. Datto, Miss Oscar Hagg, Mrs. Oscar Stetto, Mrs. Art Nelson and Mrs. Tom Stetto.

Welcome Rain Brings Crop Relief

The rain which started Wednesday, has done much to improve crop prospects and provides at least temporary relief to the parched crops. At nine o'clock Thursday morning .45 of an inch of rain has been recorded.

Miss Kay is Honored

A meeting of the Amity Club which was of special interest, was held at the home of Mrs. J. E. Carlson, on the afternoon of June 28th, when the ladies of the Amity club and school district, took the opportunity to honor Miss Kay, on the occasion of her approaching marriage, by presenting her with a set of Belgian crystal goblets and sherbet glasses. The presentation was made by the president, Mrs. W. E. Watkins, who in a few well chosen words, expressed the appreciation of the community for the valuable services rendered by Miss Kay during her four years as teacher, and wishes her every happiness in her new life. Besides the gift from the club, Miss Kay received several other valuable and useful gifts from individuals, members and friends. Although completely taken by surprise the recipient suitably expressed her thanks and extended an invitation to all to visit her in her new home. Delicious refreshments were served by the hostess, assisted by Mrs. Chappell of Calgary and Mrs. Harry Higgins.

Golf Champions

In the recent golf tournament A. McCullough defeated W. A. McIntyre in the finals to win the men's competition. W. A. McIntyre defeated Mrs. Mrs. W. A. McIntyre in the final of the ladies' competition.

In the second event A. W. Dogling defeated Rev. Dawson.

All games played were close.

Mr. J. G. Harper, director of the Lethbridge Conservatory of Music, has left for Chicago as a delegate to the convention of the American Musician's Guild of banjoists, mandolinists and guitarists, and while there will attend the Century of Progress exposition.—Leth. Herald.

Mrs. W. A. McIntyre received severe burns to the hands and arms when the gas she was cleaning clothes in ignited. Owing to the rapid assistance of Rev. Dawson, the fire was quickly extinguished, resulting in very little damage to property.

At a meeting held at the residence of J. S. Collins regarding the teaching of Grade XII in the Champion school, nothing definite was decided. A. McCullough and D. D. Farmer were appointed to further investigate matters.

Mrs. I. Datto was a tea hostess Saturday when her guests included Mrs. Campbell, Mrs. Freeze, Miss R. Campbell, Mrs. Latiff and Mrs. Farries.

Tragedy Follows Buddha Idols

Unsigned Letter With Images Says They Possess "Evil Influence"

Two wooden images of Buddha and a stone reproduction of the god have left a trail of disaster in the homes of three London business men who, in their fear, have committed suicide. None of the three men believe in superstition. Yet in each case they have been the victim of strange ill-fortune.

"Within three days of the idols being placed in the sitting room of his home in south London," said a friend to a London newspaper representative, "the third man was struck down by a severe and little-known malady."

"He is engaged in the insurance business, and is noted for his hard-headedness. He had been warned of the evil influences exerted by the idols, but had laughed at the idea."

"The first two men who owned the images were also struck by the sense of their uncanny power to bring trouble in their train."

"Victim number one is a city man, now in his sixties, residing in a small office in Bishopsgate. One day, after a conference concerning the progress of the port at which he is from time unknown source. He was on an Atlantic holiday cruise at the time."

"Yet on that day he was struck down, while still ashore. When he finally reached home his wife was dead—but still the unopened parcel was not touched."

"In the parcel was an unsigned letter, which stated that the images possessed an 'evil influence,' but no explanation was given why they had been sent to him."

"He consulted a famous medium, who said that the idols were Chinese, and belonged to the Ming period. She begged him to rid himself of them by throwing them in deep water."

"A few weeks later he gave them to a friend, having previously told him their history. His friend laughed, but when it was learned he was taken to a hospital, he lost memory and collapsed in the street."

"Now a third man has paid the penalty of possessing the idols—he was taken to a nursing home—and his wife is terribly lost after his doctor also came to the house, where the idols now are."

Mysterious Old Man

Ontario Motorist Tells Stories Of eerie Experiences

Here's another story of the mysterious old man who, when picked up on the road, converses for a while and then disappears mysteriously from the back seat of the car.

A Waterloo, Ont., motorist swore it happened. Another at Galt became angry when friends doubted the story. A Kitchener lawyer tells the tale.

He was driving along when he met the old man with the patriarchal beard. The car stopped. The old man got in the back seat.

"Well," the driver said, "times are pretty bad, aren't they?"

"They are, or are they?" the man replied. "But the depression's over, mark my words. It ended on June 7."

The driver chuckled. "You seem to know a lot about it."

No answer from the rear seat.

"I say," repeated the driver in a louder tone. "You seem to know."

Still no reply. The driver looked around. The rear seat was empty.

A Unique Ship

Motorists following the Lincoln Highway through the Allegheny Mountains, east of Pittsburgh, United States, are amazed to find a "steamship" perched on the side of a mountain at one point where there is a parking place with views of the surrounding country. The structure is a hotel and restaurant, built in the form of a boat, and stands at an elevation of 2,464 feet. From its deck tourists look into three states and seven countries.

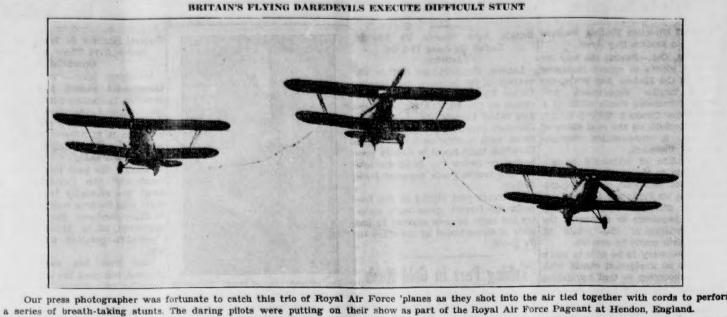

Noted Architect Dead

Frank Worthington Simon, architect who designed Monaco's Legislative Buildings and Fellow of the Royal Institute of British Architects died at Mentone, France, May 19. Other famous buildings designed by Mr. Simon include the Edinburgh International Exhibition and the Liverpool Cotton Exchange.

Meat is made up of small fibers about 1,750 to 1,400 of an inch in diameter, and up to about 1½ inches long.

"What would you do if you got a rich wife?"
"Absolutely nothing."

W. N. U. 2000

Our press photographer was fortunate to catch this trio of Royal Air Force planes as they shot into the air tied together with cords to perform a series of breath-taking stunts. The daring pilots were putting on their show as part of the Royal Air Force Pageant at Hendon, England.

Strange Tribe Discovered

Unknown Aborigines Found

Island of New Britain

Two hitherto unknown aboriginal villages, where widows insist on being strangled to death, have been discovered on the island of New Britain.

Patrol Officer H. R. Niall, of the police force, made an inspection of the villages while on an expedition across the island and lies to the west of New Guinea.

When a villager dies his widow strangles death by strangulation in order that her spirit may be freed to join his. Officer Niall says in a report to the Australian government:

"On some occasions the men, being afraid of consequences, have refused to strangle a woman," the report continues.

"Then it sometimes happens that the widow takes off her grass skirt and hands it to the men, telling them to put it on and say that they are only married as the man dies."

With the arrival was Oskar Hacker, chief engineer of the company which built it, and Josef Mansfelder, chief mechanic. Her

Hacker said six of the buses were

now in service and more were

expected to be delivered to Ecuador. They weigh 40,000 pounds and accommodate 42 passengers.

Says Shakespeare Died After Merry Meeting

Diary in Washington Library States Party Was Bard's Finish

William Shakespeare died after a "merry meeting" at which it seems he drank too hard," according to the manuscript diary of Dr. Ward who lived at Stratford-on-Avon for four years after the death of the Elizabethan dramatist.

Ward's diary is in Folger Memorial Library at Washington. It reads in part:

"I have heard that Mr. Shakespeare was a natural wit, without any art at all; he frequented the plays all his younger time, but in his elder days lived at Stratford, and supplied the stage with two plays every year, which he had an audience so ready, that he spent a rate of £1,000 a year, as I have heard."

Shakespeare, Drayton and Ben Jonson had a merry meeting and it seems drank too hard, for Shakespeare died of a fever there contracted."

Balance On Credit Side

Gold Findings More Than Paid Australian's Dental Bill

A man in Brisbane, Australia, has found that he is considerably profit in having a mouth than is on the gold standard. He went to a dentist to have some teeth extracted and when he asked for his bill found that he did not owe anything. There was in fact a very small sum to him. Instead, handed him thirty shillings, which was the balance due him after he had been credited with the gold in the extracted teeth. With gold at its present premium there is money in the fillings of worn-out teeth.

Spends Time On Sea

Frau Amalia Schlegel, who is 92, has made 62 crossings of the North Atlantic. Why? To sway the winds.

"I am an old woman," she said before embarking for her 63rd voyage, "and I travel alone because I am all alone in this wide, wide world."

Large estates in Scotland are to sell their products direct to consumers.

Employment in Italy is increasing.

BRITAIN'S FLYING DAREDEVILS EXECUTE DIFFICULT STUNT

Germany's New Rail Bus

Is To Be Tried Out By Long Island Railroad

The Long Island Railroad, one of the world's biggest carriers of suburban commuters, plans to try out a new type of railbus brought from Chicago Century of Progress Exposition from Germany.

The railbus is 25.6 feet long, seven feet eight inches wide and eight feet eight inches high. It is propelled by 80 horsepower motors and develops a top speed of 90 miles an hour.

The car has double control and may be operated from either end. It has a double set of wheels, one of rubber and the other of steel, the former running on the inside and the latter on the outside.

The car weighs 10 tons and has a maximum speed of 40 miles an hour.

It is to be used on the New York Central system.

"Then it sometimes happens that the widow takes off her grass skirt and hands it to the men, telling them to put it on and say that they are only married as the man dies."

Conseverance of the weird ritual duty of the widow, brother, or her nephews who wear a native hairy cloth around her neck and a heavy cloth until it shall be choked.

Sweden Misses "Singing Count"

Kilorglin Still Holds

Annual Goat Festival

According To Tradition Animal Saved Town From Cromwell Invasion

The rolling, heather-clad hills surrounding Kilorglin are being combed for the largest of myriad goats which ramble freely and quite innocently through the village.

This little town, probably the only place in the world which pays tribute to the scavenging animal, is preparing for its annual entrainment of Mr. Goat, alias "Puck."

The goat, which has won the Cromwell invasion, once marched across these lofty summits intending to attack Kilorglin town. But their glittering shields reflecting the sunlight scared the animals away and the people, who had followed the goat, turned and fled.

He was worshipped by the poor, who would always stop wherever he saw some one in need to give him one of the one-crown pieces with which his pockets were filled according to the legend.

As a young man Count Magnus travelled for years in many parts of the world, including Australia, America and the East. He returned and settled down in Sweden and became a popular folk hero.

He was a peasant, however, and surrounded by the food most to his taste, he reigns for three days.

For miles around all roads lead to Kilorglin, Killarney, here by sends out a crowd of tourists from many lands to see the unique animal.

Each night "Puck" is led through the town by a pack of wolfhounds.

He is illuminated with colored lights and the people join in merry dances.

On the eve of the third day "Puck" is taken to the arena by a group of stout young fellows, carried from door to door while tribute is demanded from each inhabitant.

The goat is then auctioned by the bell tolls. An amount involved in his majestic reign are paid out of the fund thus collected and the remainder given to the town bell man.

Highway Bridge Joins Venice To Mainland

London Man Tries Across Dover To Calais

Captain D'Arcy Rutherford, of London, who has crossed the English Channel from Dover to Calais on a surf boat towed by a speed boat, says he held a tow-rope which was fastened to a speed boat driven at 25 miles an hour for 10 minutes.

The time would have been less, but he hit the wash of a big steamer, and several times Captain Rutherford had to flat to avoid being thrown over. The cold was intense, as he was wet through and wore only shorts and a sweater.

The boat was built for the English Channel and has a crew of four.

It is the first boat to cross the channel since 1932.

The boat cost \$1,000.

It took 10 hours to cross the channel.

Sees World Wheat Surplus And Believes Curtailment Of Production Is Only Solution

In the April issue of Canadian Business, writing under the pen name of "John MacFarland," an authority on the wheat situation, and an article in which, after analysing the situation as he saw it, he reached the conclusion that no real evidence exists of a world surplus of wheat. In the current issue of this organ of the Canadian Co-operative movement, John I. McFarland, general manager of the Canadian Co-Operative Producers Limited, makes a spirited reply, in which he questions the basis of that conclusion, puts forth facts which indicate that there is a surplus and argues the need of acre reduction.

Mr. McFarland states that statistics show that the visible supplies of wheat had commenced to accumulate before the 1930-31 marketing crop was harvested and since that time they have continued to accumulate. He quotes the International Institute at Rome to the effect that wheat stocks will experience a further appreciable increase during the present season, that the world's wheat stocks will have risen from 563 millions on August 1 last year, to 630 millions by next August. Total international trade for this year, he states, is estimated to be somewhere between 630 and 660 million bushels, so that the exportable carryover surplus really represents 100 per cent of the total international trade for a year. The surplus, he asserts, "becomes a quantity of paramount importance as a price-making factor." Based on its present world acreage and with average crops, he states, the world's surplus will continue to increase.

As regards the position of Canada, Mr. McFarland sets forth that before the war Canada produced about 15 per cent of the world's international trade in wheat. Since then Canada has increased her acreage greatly. If this country continues its recent ascent and reaps a yield per acre, it will produce a quantity of wheat equal to that which Canada must secure very close to 60 per cent of the world's trade to dispose of its crops. Does anyone believe, he inquires, that other countries are going to leave to Canada the privilege of supplying this portion?

What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advancement is by a substantial acre reduction in acreage. In this movement, he thinks, Canada should be a leader because, in the past twenty years she has increased her acreage by a much greater percentage than any other exporting country.

The Laws of Nature of the Acts of Providence might conceivably reduce production on this over-extended acreage, but such reduction can only be of a temporary nature because after all, there are over a period of years, will make their appearance. Therefore, it appears that there is only one way of permanent correcting the existing conditions and that is by the actual reduction in acreage.

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last three years—a quantity sufficient for a year's supply. He would like to call attention to the people who say that there is no over-production and that the problem is only one of underconsumption.

The viewpoint thus set out is the viewpoint of a large element in the West which favors agreement for curtailment of production and control of distribution.

Mail-Bus Is Speedy

The "mail-bus" a new type of vehicle with a four-cylinder team engine, has been put on the Brightons-Torito's Dyke line of the Southern Railway of England. It will accommodate 44 passengers, and in test runs has speeded over 60 miles an hour.

"What is the best thing to do when suddenly faced by an infarcted bull?" asks a correspondent about fifteen miles an hour.

Canadian Mosquitoes

About Sixty Species Of This Pest Found In Canada

There are about sixty species of mosquitoes in Canada, many of which feed on the blood of man. Although the majority of them, particularly the kind known as Aedes are most troublesome in the summer months certain species are present, as far south as the Prairies, in the winter months. Attacks from them are rare. However, in many parts of Eastern Canada, the cosmopolitan house mosquito, known scientifically as Culex Pipiens, is now becoming quite common in towns and cities, and in one large city has become a public nuisance. This species is found not far from dwellings which it enters freely, biting particularly at night. How householders and others combat this pest is fully explained in "Mosquito Control in Canada," a pamphlet issued on request by the Dominion Department of Agriculture.

World's Largest Zinc Mine

In The Largest Producer

The Sullivan mine at Kimberley, British Columbia, is the world's largest producer of zinc ore and one of the leading producers of the ores of lead and silver. This mine has produced a greater amount of zinc ore than any other in the world. The output of lead is 1,261,473 tons of zinc 55,184,466 ounces of silver since it began to operate in 1900, up to the end of 1932. Last year 1,441,045 tons of lead-zinc ore were milled, as compared with 1,081,770 tons in 1931. The Sullivan mine produces nearly all the annual lead output for Canada, and of over 90 per cent of the zinc production. Since 1925 it has held supremacy in the production of zinc.

Fort Steele mining division, in the Sullivan mine is located, has about other three silver-lead and silver-lead-zinc properties, which in part account for its important contribution to the output. Many years ago this district was an important producer of placer gold, and interest in the placer prospects are again active, due to the present premium on gold. There are also in the Fort Steele area veins of non-metallic minerals, such as gypsum and crystalline rock magnetite.

No More Constantinople

Now Called Istanbul and Is Turkey's Capital

The first two things to remember about Constantinople, nowadays, is that it is not the capital of Turkey and that it is not called Constantinople. The capital is Ankara where the President-dictator, Mustapha Kemal, lives on his estate. "Turkey" and "Constantinople" mean Istanbul. It is a city with a million inhabitants and about fifty thousand starving dogs, but some time ago they were taken off to a deserted island with no food or water, so that they all ate each other until the survivor died of thirst.

One Great Advantage

School days being once more over there will be many boys and girls with nothing to do and no place to go. Here is a chance for farm produce advantages over city life. The farm boy and girl can be given some responsibility or some task that will be useful to them and not disadvantageous or costly to the parents. Farm youth do not have to spend their vacation days in idleness—Farming's Advocate.

Used Discretion

When a herd of 36 elephants paid no attention to the furious blowing of a locomotive, the state that then followed is a railway track between Bulawayo and Gwelo. After the engineer had to stop his train until they were out of the way.

To utilize surplus sugar, Czechoslovakia is converting it mixed with bran and other ingredients into fodder for horses, cattle and pigs.

GOOD LOOKING HOME WEAR HITS IMMENSELY—MAKES KITTY CHARM

Every woman knows she can't have too many home essentials that will tub and tub and always come up smiling. This year's model is just lovely.

The dress is suitable for the home, garden, porch, or deck, and is made in medium size, its decided slimming to the heavier build. The diagonal hip seam reduces bust.

The dress is dark blue and white dimity. The apron is white dimity and has a lace hem and trim.

Isn't it a one-piece attraction? And it wears with aplomb?

It is a woman's garment, and she should be pleased to have it.

Design No. 910 includes the dress and the apron in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and includes a pattern of 39-inch material for dress with 1½ yards of 35-inch material for apron.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Distinguished Canadian Artist

Wild Flowers Lived Under Brush Of Late Robert Holmes

Three years ago Robert Holmes, artist, died. Alice Wetherell writes of the painter of wild flowers in The Changer: "One day in 1927, while walking along the Keweenaw Lakes district, gave up trimming bouquets with artificial flowers, and settled down to housekeeping with her young husband in Cunningham Observatory, a quiet little town and her garden became the basis in the village. Not much wonder that was Robert imbibed of beauty. It was therefore not so strange that when he drew pictures for the first number of the Steelhead calendar, he should choose as his subject the back doorway to that house, his mother inside washing dishes, and outside directly in her line of vision, the grapevine, the hills and poppies masses against the walls.

"Not even remarkable that the lad, brought up with such a background, should finally become Canada's most distinguished painter of flowers, and the greatest painter of American wild flowers in their native setting."

The fireweed, loose stripe orange and Indian pipe, in Holmes' water colors, are never stiff poses, but always full of life, as though he had been there himself. He alone seemed to have the power to put this subtle sense of life into what are usually regarded as still-life pictures. Yet it took weeks of work to get that spirit that you smell the perfume and feel the breeze as he did.

"He was a student of the Toronto Art Society and of the Royal College of Art in London. He chose Canadian flowers for his designation, and as a student of the Steelhead calendar motif on which to base their work. With the words 'flowers' on his die, and according to his wish is buried in a little lot beside the woods where he so often wandered as a boy."

The man was a student of the Toronto Art Society and of the Royal College of Art in London. He chose Canadian flowers for his designation, and as a student of the Steelhead calendar motif on which to base their work. With the words 'flowers' on his die, and according to his wish is buried in a little lot beside the woods where he so often wandered as a boy."

Want African Colony

Germany Seeks Room For Expansion And Means To Pay Debts

Germany is asking the world for an African colonial empire.

A memorandum prepared by Dr. Alfred H. Krupp, Minister of Economics, for the economic committee of the world conference, says there were two possible ways of increasing Germany's capacity to pay her international debts: one by giving her an African empire, while large public works schemes could be carried through; or, second, by opening other new territories "to this people which has not enough space in which to live."

Money From Trees

Australian, strong as it may seem, is teaching its young people that money grows on trees. Under adult guidance, state school children of Victoria have set out 4,000 acres of saplings that will yield 100,000 dollars a year. Part of the sale of bark and timber will be used to provide scholarships, libraries, radio and sports materials.—Christian Science Monitor.

AFTER THE RECORD HOP FROM SPAIN

Showing little effects of the strain of their hazardous flight, Captain Matilde Berberian (left) and Lieut. Joaquin Culier, Spanish Army flight, are shown at Casablanca, Cuba, on the completion of their record flight from Seville, Spain, in the plane "Cuatro Vientos" (top). Their route took over 4,500 miles of ocean.

Present Year Marks The Diamond Jubilee Of The Royal Canadian Mounted Police

This year marks the diamond jubilee of the Royal Canadian Mounted Police, formerly the Royal North West Mounted Police. This famous force was established in 1873, following the acquisition of the western provinces in 1870 by the Dominion of Canada. The Indians at that time were powerful and prosperous, but were being demoralized by liquor sellers and by tribal warfare of a nature to discourage friendly relations with the white man.

Felix, the phantom of the movies, could not hold a candle to Jackson Bond Street. He figured in novels, plays, and innumerable gossip columns.

Now like other martyrs to the cause of High Life, he died of acute indigestion at the comparatively early age of eight.

It is hard to estimate how much smoked salmon, fat gras, big of chicken and caviare he ate in the eight years he associated with the elite who passed through the portals of the Embassy Club.

Guests at distinguished guests to the club were invited with bits. Often he turned disdainfully away, but not often enough. It got him in the end.

Lambert green eyes, arches well-aimed, in a fashion which he would sit on the knee of a millionaire or the lap of a film star, and then no one would move him. Sometimes he would jump through a human hoop formed by a waiter's arms, his only partner trick, but only on rare occasions.

Jackson Junior, a small black kitten, now reigns in his stead. At his first appearance, he tasted caviare, blue trout and salmon, and his appetite was too good for any kitten who hoped to live past the age of eight. If only his absent parent could warn him of the risk of rich living!—Jackson the "High Life."

Coral Not a Rock

Every Inch Is Built By Tiny Sea Animal

Coral is not a rock, it is made of skeletons. It is really a colony of tiny sea-anemone-like organisms, and not of an even brown color. It has many tentacles round its mouth, and when it has caught its food it floats it through its body on a stream of water, which is continually sucking in. This sea-water contains lime from the lime in the water and uses it to build a tiny platform for it to rest on. Gradually it makes a home for itself out of lime, and in that it lives till it dies. Then the next coral animal shells along and builds like a shell on top of old one, and so on. After thousands of years billions of these creatures will have made a huge mass of lime, which comes above the surface of the sea and make a coral island. Great Barrier Reef, Australia, is hundreds of miles long yet every inch of it was made by tiny creatures.

Historical Garden Roses

Origns Of Beautiful Hybrid Perpetual Roses In Canada

At the end of the eighteenth century the Chinese had the habit of eating roses, which was brought to Europe, says the Dominion Horticulturist, Dr. Macoun, in discussing the probable origin of the beautiful hybrid perpetual roses in Canada. Beaufort, very long hybrid roses, first rose in France and Provence roses were raised. These were called Hybrid Chinese, but took after their European parent in that they flowered only once in the season. These roses were very fragrant and were much used in perfumery.

Afterwards, in 1819, roses were introduced into England, and in 1820 into America. These roses were called Hybrid Chinese, but took after their European parent in that they flowered only once in the season. These roses were very fragrant and were much used in perfumery.

Electrically Charged Clouds At Niagara Falls

Electricity experts take a keen interest in the clouds at Niagara Falls, because they are the most electrically charged clouds in the world. The falls are the source of the electric currents, and in the fifties such gardens flourished as General Jacquemint and Jules Margolin were introduced. In Canada many of the hybrid perpetual roses bloom only in the season.

Needs a Pension

Hadjy Bey, a Turk, has 43 children—38 boys and five girls. This is believed to be a world record. The Sultan used to give Hadjy Bey a pension, but when he stopped Hadjy has now applied to Mustapha Kamal Pasha for a pension.

British railway passenger cars have sufficient seats to accommodate more than one-twentieth of the population.

What Is the Best Thing to Do When Suddenly Faced by an Infarcted Bull?" asks a correspondent about fifteen miles an hour.

"Quite, sir," replied the lunch counter attendant. "Each one is wrapped in transparent, airtight paper."

"Good," said the customer. "I wish I'd known that."

Bit Of A Puzzle

"I'm glad you're so impressed, dear, by my achievement," he began, "but I'm afraid it's rather bad banking and economics," remarked the young husband.

"Yes, darling. It seems wonderful that anybody could know as much as you do about money without having any of it."

"SALADA" TEA

"Fresh from the Gardens"

Who Owns Canada?

The question which appears as the heading of this article was included in examination papers recently submitted to pupils in Montreal schools under the jurisdiction of the Catholic School Commission of that city. Answers to the question reveal such vague and uncertain knowledge regarding the status of the Dominion that the Commission appealed to the Secretary of State at Ottawa for an authoritative definition of Canada's status within the British Commonwealth of Nations, and among the world's nations.

The answer, given over the signature of Hon. C. H. Cahan, Secretary of State, defines Canada as a self-governing state of the British Commonwealth of Nations. It sets forth that Great Britain does not own Canada any more than Canada owns itself, and that Canada and Great Britain are both independent members of the British Commonwealth, and that the Dominion belongs to the people of the Dominion.

This answer should set at rest a large amount of uncertainty among Canadians regarding the official status of the land of their birth. It was evident from the answers submitted in the school examinations at Montreal that a large number had been submitted entirely by the pupils, and the secretary of the Catholic School Commission had stated that far more attention will be paid to it. It would be well if this was done, not only in the Catholic schools of Montreal, but in all schools throughout the Dominion.

Canada is today an absolutely free and independent nation—just as it was when the King of France was King of England. The King of Canada is King of Great Britain, King of Australia, Emperor of India. In Canada the King is represented by the Governor-General, who is appointed by the King on the advice of the Government of Canada. At one time the Governor-General was appointed on the advice of the Government of Great Britain, and he represents that country. Now, however, the Governor-General in Canada, and he who represents the Crown only within the British Commonwealth is represented in Canada by a Commissioner in the same manner as the United States, France and Japan are represented by Ministers, and Canada is represented in Great Britain by a Commissioner just as other countries are represented there by Ambassadors and Ministers.

The term and status of "Commonwealth" is employed between two Dominions of the British Commonwealth because each have a common sovereign, and such a sovereign does not send an Ambassador or Minister to represent him to himself as he does to represent him to other sovereign nations. The Crown being represented in the person of the Governor-General, the King's several governments are represented the one to the other by Commissioners.

The answer to be asked is: If Canada is an independent, fully self-governing Dominion of the British Commonwealth of Nations, why does it not enjoy the power to amend its own constitution, and why are appeals taken from decisions of the Supreme Court of Canada to the Privy Council in Great Britain? Other nations, it may be urged, have power to amend their own constitutions. The Supreme Court of Canada is an appeal court, and the King's several governments are represented the one to the other by Commissioners.

The answer is, that Canada can exercise both these powers whenever the people of Canada desire to do so, and probably the time will come when they will do so. Up to the present, however, Canada has preferred to retain to itself the right of carrying judicial appeals to the impartial tribunal of the Privy Council, especially in all matters in dispute between the Federal Government and Provincial Governments. There is no compulsion that it should do so, and it can refrain from so doing, or can abrogate that right should it deem it wise to do so.

So, too, in regard to amendments to the Canadian constitution. The B.N.A. Act created a confederation of Provinces, reserving to the Dominion certain exclusive powers on the one hand, and to certain other provinces powers to be exercised on the other hand. While in the original B.N.A. Act, the division was divided between the two authorities, the Provinces, therefore, have as much right as the Dominion itself to say when and how the constitution shall be amended, and up to the present time certain of the Provinces have preferred to leave the matter as it was at the time of Confederation, with the Canadian Parliament making such amendments to the Constitution of Canada as the Canadian Parliament, with the consent of the Province, may request. But Canada can secure full and final control over its own constitution if and when the people so desire.

So the complete and final answer to the question: "Who owns Canada?" brings us back to the definition given by the Secretary of State at Ottawa—the Dominion belongs to the people of Canada. They are masters of their own national destiny. No one tax them but themselves; they pay tribute to no other nation. Canada can make its own treaties with other nations irrespective of the effect such treaties may have upon other Dominions of the British Commonwealth.

But, because the Dominion belongs solely to the people of the Dominion, the great responsibility rests upon them as a whole to rule the Dominion, and to associate with and co-operate in the League of Nations, to govern themselves, and to conduct their national and international relationships, as to command the respect of and wield a great influence for good in the world. There should be no spirit of a narrow nationalism in Canada; quite the reverse.

Maryus Are Youthful

The new mayor of Detroit is 31 years old and everyone is commenting on the fact that he is extremely youthful to be assuming such a heavy responsibility. We should like to point out that Mr. J. E. Pringle, general superintendent of transportation for the Canadian National Railways, recently received the following wire from A. MacNab, of Peterborough:

"Dear Sirs: I am pleased to inform you that our young manager, Mr. J. E. Pringle, is now 33 years old and that he is now well into his second term. He was 30 when he took on the job and, furthermore, he had no aldermanic experience.—Border Cities Star."

Of course Maryus are very creatures who like to be looked at but you've noticed who does the most marching in parades.

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are subject to it during the summer months.

You can tell when it comes you how it is going to end. Let it run its course for a day or two and see how weak and prostrate it will leave you.

On the strength of a few words of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Chemical Products

Depression Does Not Seem to Affect Demand For Toilet Preparations

It is evident from the study of the production of chemicals and allied products in Canada in 1932 that the depression has practically no effect on the demand for toilet preparations. In 1928 the selling value of these products was \$16,486,291, where they were made up to \$16,486,291. In 1931 the value of the output had risen to \$35,496,292 and in 1932 it was \$30,673,134.

The demand for medicinal and pharmaceutical preparations continues on the upgrade. In 1928 the combined value of these products made in Canada was \$17,224,351 and in 1932 it was \$18,145,773, the high mark of \$19,038,594 being reached in 1929. The value was \$19,299 for four or several months' prices of every commodity we're at their highest.

The chemical and allied products in Canada is a dominant one. Last year the chemical products had a value of \$85,510,940. This is divided into 14 groups and there are 628 factories, most of which are in the Province of Ontario and Quebec. The 14 groups are as follows: carbonates; alkalis; acids and salts; compressed gases; paints, pigments and varnishes; soap and washing compounds; medicinal and pharmaceutical preparations; toilet preparations; food and distilled beverages; perfumes and dressings; flavouring extracts; and miscellaneous chemical industries.

Imports into Canada under the classification of chemicals and allied products were valued in 1932 at \$27,351,661. Among these imports \$27,351,661 was purchased from United States and 17 per cent. or \$4,719,074 from the British Isles. Exports from Canada increased slightly.

In 1932 the total value being \$11,033,179 up from \$10,848,941 in 1931.

United States, United Kingdom, Mexico, Portuguese Africa, Newfoundland, Hawaii, Australia, British India, Netherlands, Cuba and China in the order named were the main purchasers of Canadian chemicals and chemical products.

Membership Shows Decrease

Quakers Are Having Controversy

Only Members By Brighten

According to the Society of Friends—the Quakers—shows a slight decrease in Great Britain during the last 12 months. There are now 19,119 registered members compared with 19,213 in the peak year of 1929.

The Society of Friends is one of the few religious bodies into which a child is accepted at birth, without either baptism or, at a later date, confirmation or confession of faith. The Quakers, though originally recently had serious criticism, and it is now possible for Quaker parents to delay the acceptance into membership of their children until the young people are of an age to decide theological matters for themselves.

Last year the society accepted by conviction 219 new members, 47 fewer than in 1931, while 130 individuals either resigned or were disowned or disassociated. There were registered 59 "brightening" members and 50 more. So 513 Friends were lost to the society.

More Freight Moving

Transportation Situation Shows Signs of Improvement

The transportation situation in Canada is showing considerable improvement and reflects the increasing confidence of the buying public and improving internal and external commerce, said a bulletin issued by the Department of Trade and Commerce. Carloadings for the week ending June 10 numbered 40,842 cars, an increase of nearly 2,000 cars over the preceding week and representing the largest movement of freight in 34 weeks.

"Movement of merchandise freight, representing as it does the shippings of almost all of the right half of a woman's brain with no noticeable effect on her mental and physical condition," said Dr. Gardner, on the left side was reported to the American Medical Association. Twenty months after the operation, Dr. Gardner said, "examination disclosed no change in intellect."

"Movement of merchandise freight, representing as it does the shippings from manufacturers to wholesalers and wholesalers to retailers showed a marked improvement," said the department of merchandise by railroad had increased to nearly three-quarters of normal, while that via canal boats in May was approximately double that of the corresponding month last year. Iron ore passing through the Sault Ste. Marie Canal was heavier by over 6,000 per cent. and aluminum coal was practically double that of May, 1932.

There is a saying that heaven will protect the poor working girl. "But who will protect the guy she is working?" asks a college wise-cracker.

On the strength of a few words of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

HAD RHEUMATISM FOR 20 YEARS

But None Since 1930

This man must have something like a record for suffering. He says—"Since 1910 up to 1930—that is to say with rheumatism, I am pleased to say that since 1930 up to date, I have been free of the despair of all concerned with it, has been taken in hand by taking Kruschen Salts—and nothing else—I must say that 20 years is a long time to be troubled with a chronic pain about the knee." —W. P.

Your rheumatism? Just like us you've got to take care of it. You sharp-shaped uric acid crystals getting into your joints. Kruschen will help you get rid of them—no more—if you keep up the "little daily dose" ever afterwards, it will be possible for you to get rid of your rheumatism. Rheumatism will be gone for good.

Joy-Riding By Air

New York People Have Money For Extravagant Novelties

Late one night the staff of St. Louis Airport, near Montreal, had thought an airplane was coming in, and thought it was a house builder.

They sighted two men and a woman in aviator suits. A taxi cab was in waiting, and it hurried them away to Montreal.

Just before four o'clock the party returned, boarded the "plane," and were back in New York for an early breakfast.

Then between sunset and morning these people travelled to Montreal, had three hours in that city, then home in time for work. The cost of the round trip was \$1,500. If the airplane had been moral, it would have paid its passage itself. During the war it made itself useful, first as a harbor for Belgian refugees, and later for German prisoners.

The only good thing in the Palace of Mystery is the organ. This was the masterpiece of "Father" Henry Willis, Music-lover of North London a few years back contrived to find the money to make the organ as good as new, and week-end concerts at the palace have been popular.

Permanent Exhibition Planned For London

Alexandra Palace May Be Turned Into Amusement Place

There is a prospect of London being associated with permanent "amusement exhibition." The Alexandra Palace, on the northern heights of London, Eng., which has long been the despair of all concerned with it, has been taken in hand by a few, fewer than 18 local authorities, who have recommended grants for its modernization which will add up to \$1,000,000. It is proposed the Palace shall be so renovated as to convert it into a first-rate place of entertainment and general amusement.

The history of the Alexandra Palace is a dreary one. It was opened exactly 60 years ago as a northern rival of the Crystal Palace, which stands on the southern hills bordering London.

For 20 years following, it had full bursts of enterprise. At length it was abandoned, and the park falling to the speculative house builder. The park, which extends to almost 200 acres, was a valuable acquisition, but nobody ever has been able to do anything effective with it.

After the First World War it became a house builder, first for Belgian refugees, and later for German prisoners.

The only good thing in the Palace of Mystery is the organ. This was the masterpiece of "Father" Henry Willis, Music-lover of North London a few years back contrived to find the money to make the organ as good as new, and week-end concerts at the palace have been popular.

Social Progress

New Keep Pace With Scientific Advance, Says Hon. R. J. Manion

Social progress must keep pace with scientific advance in order to bring about a better standard of living for the world's products, Hon. R. J. Manion, Minister of Railways and Canals, told the Canadian Electrical Association at their annual banquet at Lutecia Restaurant.

Mr. Manion urged that not only

public but business men and scientists give serious thought to bringing about social reforms that would enable a greater number of the people to share the benefits of what they produce.

The minister made electrical development the theme of his address but touched also on the problems of the railroads and the world economic conference.

It was inconceivable, he said, to achieve justice if there should be difficulties between the European nations and United States, Canada would be an excellent position to act as an intermediary, Dr. Manion said, but did not anticipate any such difficulties.

He expressed the belief that the vast majority of people in Canada were opposed to the export of electrical power, not only because it was a direct loss to industrial possibilities in Canada but also because of the difficulty in shifting off power from a friendly country once communities had been built up in the power exporting area.

Cypress Hills Park

Highest Elevation of Any Part Of Saskatchewan

Cypress Hills Park, known as the Highways of Saskatchewan, will be opened this year. This park is 10 miles long and the highest deviation of any part of the Province of Saskatchewan. Some of the streams in the park flow south to find the Missouri River and some north to join the Arkansas River and then to the Colorado River and finally to the Gulf of California.

The park is 4,500 feet above sea level and part of it is even higher than Banff, the famous mountain resort in Alberta. New buildings in the park include one lodge with 18 large rooms and a number of log cabins.

Tax-Free Bond Rating

Tax-free Victory bonds forfeit that exemption when they are paid out by a company to its shareholders in the form of dividends. This was the judgment of the supreme court of Canada, Mr. Justice McLean dissenting, on an appeal taken before it by D. J. Waterson of Bradford. The judgment dismissed the appeal with costs.

An historian announces that women motorists when caught speeding are curiously lame and hockneyed, complains a correspondent of the *Montreal Standard*.

Why not entice a girl friend over in San Francisco, who declared, truthfully radiating from her big blue eyes, that she thought a fire engine was behind her, and that it was up to her to hurry and get out of the way?

She was chased by a score of police and did not stop until two of them had fired her with them. Why are not our own traffic police encouraged by the "Yard" to tackle their job in this modern and virile way?

At least a dozen girls have been shot by police in the past year, mostly along bypass roads during summer weekends to increase respect for the law, even if it were to fly blank.

Tax-Free Bond Rating

CHAPTER XII.—Continued.

She held his hand a moment in her warm grasp, thinking of her father lying dead at Reservoir, or Alan's noble struggle to save him, or Haskell's deathless efforts to save him. It was some solace to know that she had helped Alan plan a trap for the guilty Inspector, a deadly trap if Haskell only walked into it.

As she quietly wished him good luck in his venture, she turned away to him, "God go with you, Alan!" And because she had passionately resolved not to see him again before she left, she meant her words not only for the stormy hour ahead of him, but for all the years of his life.

Alan stood into the cabin in a savage fighting mood. He had risen from a sick bed to come to Endurance before Williamson had left, and he had sworn to himself that he would not let the Inspector had forced him out of the Mounties; had caused Larry to be crippled for life; had refused protection to Joyce in her desperate need; had made a scapoose of Dave MacMillan; had given up his face, and more than anyone on earth he was responsible for that sorry tragedy at Reservoir.

Almost the only hope Alan had was that trap which he and Joyce had planned—an idea born in Joyce's quick brain and developed between them during the three days she had pursued him.

When he went in, he found Williamson and Haskell sitting at the desk, waiting. Haskell did not move; but Williamson, considerate of his wounds, drew up a chair and invited him to sit down.

"Won't you give us the story of your patrol, Baker?" he requested kindly.

Alan countered, "My story doesn't begin with you. I was patrolling with Haskell—Williamson did not accept that as true. From start to finish, he was trying to prove that he was right."

"That's your right," Williamson answered. Alan hoped that his story, by sheer blunt truth of it, would carry conviction. But when he finished, the old officer did not comment. The was foreboding. Almost in desperation, Alan took up a couple of matters that lay very near his heart.

"There's two or three favors I want to ask of you, sir. Since they're not in my own behalf, you may agree to them. One is about Chink Wau. I want you to let him out, and just to put in a word for him. He deserves heavy punishment but he shouldn't be hanged. He gave us some priceless information. We might never have saved Joyce MacMillan if he

hadn't. If it's impossible for me to be present at his trial I want to turn over to you an affidavit in his behalf. Then, about Featherof, my partner in the business. He stole some government property, and it's mostly regulations. But he made the whole thing possible, he threw in with me without a thought of pay, he risked his life a dozen times. We're in position to get back the property or else pay for it in full. Will you get Fatherof out of this jam?"

"How about yourself, Baker?"

"Well, I don't want to be jailed. If I can help it. But I suppose your favoritism will just so far. I was the instigator, and if anybody had to pay, I'm the one."

Williamson was thoughtful. Few times in his career had he ever allowed motive, however worthy, to sway him. He glanced at Baker, wounded maimed in one hand, still pale from loss of blood, he thought what a heartless travesty of justice it would be if Baker were to be punished. What was most of his trouble with Haskell, the great fact remained, that he had gone on a thankless, prodigious patrol and had run the criminal to earth.

"The first thing you can do for him, I promised, with no reluctance. When I go back outside, I'll talk to the Edmonton officials and try to get those charges nol-prossed. But you and Featherof see to restoring that property."

Alan promised: "We won't fail you on that. It's mighty fine and square of you." After a moment, he went on: "Considering all you've agreed to, I hate to ask still another favor, to have you go to the court to speak up for Haskell and Featherof."

Those hours intended to return here were filled with a sense of awe, rendered a tremendous service to the Force. They were true to duty in the highest sense of the word. Are you going to look at the good they did, or at nothing but the bad?"

Williamson did not reply. He felt the human justice of Alan's appeal was deeper than a question of in-subordination. Those men had been under Baker's sway, and he knew what a powerful influence Baker had on the men.

Thinking deeply, he gazed through the window, down upon the dark river. In this tangled affair, it was a struggle to discern the right from the right, Baker's long-standing and indomitable courage in going after these men, his relentless drive in pushing his daring plan through to success—the whole thing was a tangled web.

"Baker is a hero," Williamson said sternly. "You infer you wanted to go after those men so badly that you were willing to buy out, cut off your record and sign a lie. Why then would you co-operate with Haskell to get them?"

"Well, sir, he—he wouldn't co-operate."

"I can't believe that. He tried to buy you ever afterward—after you bought out and were on a private venture?"

"When was that?" Alan queried. "At Enn Traverse Lake."

"He was trying to help us. I didn't—ah—have that impression at the time."

"He even shot signals for you to wait."

Bill Hardwick snored loudly. "Of and the fork-tongued lies—that's the beat of 'em all."

Alan followed the lie to go unchallenged. If Haskell got by with that, he would be bold and unwary.

We've had to pay, too, for the inspector's acts. Here's one of us impressed for life because the inspector hog-tied us on that patrol with 'some orders. After a thing like that, do we have to shut up our tales and not even be allowed to—?"

"Sit down!" Williamson bade them. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want to ask you some questions. What made you spit your detail on that first patrol?"

"It's a lie!" Haskell challenged, allowed him to do as he thought best. He had only suffered a failure that caused him to act like a fool, he glanced at Baker, wounded maimed in one hand, still pale from loss of blood, he thought what a heartless travesty of justice it would be if Baker were to be punished. What was most of his trouble with Haskell, the great fact remained, that he had gone on a thankless, prodigious patrol and had run the criminal to earth.

Alan kept silent, deliberately allowing his silence to damn him. Williamson's probe was leading in the right direction, leading toward that deadly trap.

To Alan's consternation Bill Hardwick said, "Proost! H—t's blue blase! Alan was half sick, all the way up the Alooosa, because of them orders. He felt he was being forced to take us men into a terrible danger. He knew it was crazy to stand up."

Williamson silenced him. "You're merely making an assertion, corporal. You have no proof, Baker, do you admit responsibility for that patrol?" Alan shook his head. "No, I—don't, he stammered.

Haskell smiled. He had Baker on the run.

Williamson reminded: "Baker, you signed a statement of 'Responsibility' while you were here?"

Alan pleaded, "Sir, that statement—"

"When we came back—yes, signed it. But I—I had to."

"You had to?"

"Yes, to get out of the Mounted. We wouldn't let me buy out unless I did sign."

"Why under heaven did you want to buy out all that fast and furious?"

"I wanted to be free," Alan led on step by cautious step. "I wanted to be free."

"Baker, he said, "Baker is a hero," Williamson said sternly. "You infer you wanted to go after those men so badly that you were willing to buy out, cut off your record and sign a lie. Why then would you co-operate with Haskell to get them?"

"Well, sir, he—he wouldn't co-operate."

"I can't believe that. He tried to buy you ever afterward—after you bought out and were on a private venture?"

"When was that?" Alan queried. "At Enn Traverse Lake."

"He was trying to help us. I didn't—ah—have that impression at the time."

"He even shot signals for you to wait."

Bill Hardwick snored loudly. "Of and the fork-tongued lies—that's the beat of 'em all."

Alan followed the lie to go unchallenged. If Haskell got by with that, he would be bold and unwary.

Veteran Globe-Tracer

Cleveland Man At Eighty-Six Starts On Another Trip

D. Jay Colver has packed his old kit bag and started off on another jaunt, this time to celebrate his 42nd wedding anniversary.

Colver is 86. He is said to be the oldest man in Cleveland, Ohio, exactly 79 times for foreign parts, and has covered something like 3,000,000 miles.

Entirely interested in travel, he got rid of his business a few years ago to concentrate upon the call of wanderlust.

"I got settled down about a year ago, but then I got to ailing and decided a trip would help me out," he said.

Consequently, Mr. and Mrs. Colver sailed together to celebrate their wedding anniversary. Offhand, Colver recalls the following jaunts around Africa, several times around South America, three times to Japan and China, 30 times to Florida and Cuba, and 31 trips to the Pacific Coast.

Shipments of Canadian raccoons which was sent to Finland some time ago for breeding purposes is reported to be flourishing. Now all Finland needs is a college.

"Some men are born great, some achieve greatness, and others just grate on you."

Effect Of Depression

Not Very Soothing To The Nerves

In The Opinion Of Some

A New York doctor says the depression saved the world from a nervous breakdown. It has been too fast, he thinks, financially and otherwise, and could not have stood the strain. In proof he submits that the mental hospitals filled up during the boom years. He expects fewer patients in years to come.

Authority is always to be respected and questioned with due reserve. Yet one would like the expert to explain why suicide epidemic that has taken the nation in the last three years. People do not take their own lives when they are in a state of mind.

The doctor doesn't know where or when the depression began. The years were hard on the nerves. Dr. Whipple was here in the cabin and heard our Baker, and Baker, by his signed statement, admitted to responsibility.

Alan kept silent, deliberately allowing his silence to damn him. Williamson's probe was leading in the right direction, leading toward that deadly trap.

To Alan's consternation Bill Hardwick said, "Proost! H—t's blue blase!"

Alan was half sick, all the way up the Alooosa, because of them orders. He felt he was being forced to take us men into a terrible danger. He knew it was crazy to stand up."

FRANCO-U. S. TROUBLE WAS SOON ADJUSTED

London, Eng.—The secret meeting at which Franco-American differences were adjusted provided the most dramatic incident since the inception of the world economic conference. The meeting was held in a private room in a secluded part of conference headquarters.

Prime Minister Ramsay MacDonald, president of the conference, knew the full import of the meeting. Veterans of the war, in whose interests the conference remained alone in an adjoining room, pacing the floor, his hands clenched, back and forth, back and forth, he walked, his silvered head bent toward the door, listening for the knock which would mean that the conference was saved or that it had collapsed.

When Mr. MacDonald was informed his face lit up with joy.

At a press interview Corlett Hunt, the Canadian minister of finance, declared that much emphasis had been placed on temporary currency stabilization and that the United States deemed such action now "unimpressive."

Snow Slide Victim

Find Bodies Of Two Men Lost Since Last February.

Fishel, B.C.—One hand jutting above rock and melting snow had led to discovery of Cris. Deam, 26, and his brother, Joe, 23, lost in Duthesney Pass since January 7. The two young men both residents of Jasper, Alberta, were missing in snowdrifts in the pass as they attempted a ski journey from Camp Hector to Field, 30 miles through winding passes. Worst parties will leave camp to dig the bodies out of the debris.

Discovery of the bodies was made by two Swiss guides, Rudolph Ammer and C. Haeberle, who were conducting a search for missing Indians since the young men disappeared, a brother Frank, 20, making trips through the area at every opportunity.

Parents of the young men reside at Banff.

Famous Racing Motorist Dead

Sir Henry Birkin Was Victim Of Blood Poisoning

London, Eng.—Despite a desperate battle by doctors, Sir Henry Birkin, 36, a famous racing motorist, died yesterday morning from the effects of blood poisoning resulting from burns received in the Tripoli Grand Prix in May.

Sir Henry had been critically ill for three weeks after three blood transfusions were tried.

He had been one of Great Britain's leading drivers since 1927.

Sir Henry Birkin was born July 26, 1896. He succeeded his father to the baronetcy in 1931. It was created in 1905. He served in the war from 1914 to 1918.

Trouble Over Taxes

Ten People Reported Killed In Blots In Poland

Warsaw, Poland—Nine persons and one policeman were officially reported dead, while 100 persons are reported to have beaten tax collectors in the Galician districts of Ropczyce, Rzeszow and Lancut. Sixteen persons were seriously wounded. Many arrests were made and numerous escapes to the forests.

Grasshopper Invasion

Winnipeg, Man.—Thirty thousand acres of green crops in Winnipeg and surrounding suburbs and towns were threatened with destruction by an invading horde of grasshoppers as western Canada's wheat lands, baked by a searing sun "during last week's heat wave, failed to receive the much-needed moisture promised.

Theft From Mint

Ottawa, Ont.—John R. Wallace, a member of the Royal Canadian Mounted Police here, charged yesterday in police court here to stealing \$10 in gold coins from the Canadian mint. He was remanded for sentence.

Honor For Einstein

Brussels, Belgium.—The University of Brussels recently conferred upon Prof. Albert Einstein the title Doctor Honoris Causa of the faculty of sciences.

W. N. U. 2000

Aids To Navigation

To Install Direction Finding Stations

In Hudson Bay Area

Ottawa, Ont.—Paving the way for the installation of radio direction finding stations in the Hudson Bay area, the federal marine department will shortly commence construction of a short wave direction finding station at Chesterfield, on the east shore of the bay, at a considerable distance from Churchill.

Installation of additional navigation lights in the strait will not be undertaken this year. The department has no funds for this purpose and, in addition, further survey work is required to determine the precise location of the points at which lights would be erected.

It is necessary to be able to mark all lights on navigation charts with their exact position, and when this is done, light may be placed on the position. Hitherto a detailed hydrographic survey of the north shore of the strait had not been carried out and if lights were built this year, only approximate position could be given.

The tract pact signed at the Imperial conference gives each country the right to seek revision in the scale of debts levied by the other on its goods.

Taking Part In Gold Rush

Many Indians Using Sailing Canoes To Reach North

Pas, Man.—Fleets of sailing canoes, some of them gaily painted and mounted by Crees, are drifting ahead in the streams of the northern lakes, heralding the new summer's gold rush in God's lake.

The purr of the outboard motor is heard across the hinterland. Even Indians, without the cash to secure outboards, have jumped into the "rush" with canoes and are swinging paddles, oars and sweeps, as they freight their way into the mineralized zone.

PROPOSAL IS MADE TO REDUCE WHEAT ACREAGE

Capt. Brothac And Two Mechanics Lose Lives In Air Crash

Prince Albert, Sask.—The first aircraft tragedy of the year in southern Saskatchewan claimed the lives of three men near the Brooks base at Emma Lake, 30 miles north of here.

The dead are: Capt. B. W. "Bill" Brothac, pilot, 42; Hiram C. Brooks, pilot-mechanic, 24; T. D. Forsyth, mechanic, 28.

Brothac, well known western commercial flyer, who served with the Royal Navy Air Service in France and Italy, was flying for the Dominion airways when he attempted a record-breaking flight at an altitude of 2,000 feet. With him were Brooks and Forsyth, mechanics of the Brooks Aeroplane Co., Ltd. In the course of their tests the plane dropped in a spin for some unknown reason and plunged into a bay of the lake just north of the air base, at 4 o'clock in the afternoon, after the machine had been in the air for 15 minutes and loops by the pilot. The plane, falling at about 10 feet of water, was smashed to pieces and the engine buried in the bottom of the lake.

The body of Brothac and Forsyth were recovered shortly after the crash, while Brooks' body had not yet been recovered. The lake bottom was being dragged for the third body.

Forsyth, mechanic, was scarcely recognizable, while Brothac's head was badly crushed. Brooks was the son of R. D. Brooks, of Prince Albert, president of Brooks Airways.

The bodies of Brothac and Forsyth were recovered shortly after the crash, while Brooks' body had not yet been recovered. The lake bottom was being dragged for the third body.

Review Tariff

REPRESENTS CANADA

Dr. Frank O. Adams, Emeritus Vice-President of the Royal Canadian Academy of Science and Logan Professor of Geology and Paleontology at McGill University, who has been appointed to represent the National Research Council at the International Geological Congress which is to meet in Washington from July 22 to 29.

Cannot Help Manitoba

Federal Minister Of Trade and Commerce Says There Is No Co-Operation

Winnipeg, Man.—"The Dominion Government cannot help Premier Bracken to finance provincial unemployment relief," said H. H. Stevens, Minister of Trade and Commerce, said in an interview here.

"During the past three years," he continued, "the Dominion Government has earnestly tried to co-operate with the four western provinces. In three provinces they have been successful, but in Manitoba no reciprocal co-operation was forthcoming."

"Not once but repeatedly Mr. Bracken asked me to help him out of financial difficulties for political purposes, but I made it difficult for the Dominion Government to assist the province. I am not the man who has made the effects which he could have made to handle the relief question."

Predicts Stratosphere Flights

New Type Airplanes Will Make This Possible Says Picard

New York—Professor Auguste Picard, arriving from Europe, said that on the strength of his studies that the time for flights in the stratosphere is near. He predicted that within a few months the first airplane to cross the Atlantic will make possible flights in the stratosphere.

"These planes should go between 450 and 500 miles an hour," he said.

"They will have little resistance because they fly at that altitude is so light."

"Once the plane reaches such an altitude the pilot can set the course and cross from America to any point in Europe in a few hours."

Picard, who is going to Chicago, where he will advise preparations for the stratospheric balloon flight of his two brothers, Jean Picard, and Commander Etienne Sette of the United States navy,

STABILIZATION OF CURRENCY BONE OF CONTENTION

London, Eng.—Prime Minister J. Ramsay MacDonald, chairman of the World Economic Conference, was informed yesterday that the proposal to stabilize currencies by a minimum of 10 per cent. was to be rejected.

All data relative to the financial status of the government or foreign currency for which proposals are intended to be raised must be furnished by the agents of the United States to the federal trade commission.

Just as domestic securities, foreign securities must be registered with the federal trade commission.

Quarrels were clearly disturbed by the solid lining up of many countries opposed to dollar instability.

Germany, France and Italy were in common that one of the chief points of the Washington program was stabilization as soon as practicable along the lines laid down in the resolution submitted by Senator Key Pittman.

A succession of speakers pleaded for monetary stabilization as essential to restoration of confidence, including representatives of Italy, Switzerland, Poland, Norway, Germany, France and Yugoslavia.

The discussion areas during consideration of a British resolution calling for easy money and cheap credits.

The conservative gold standard countries showed the feasibility of the program and warned of its possible dangers.

RESENTS TARIFF BRITAIN IMPOSES ON FREE STATE

London, Eng.—The Irish Free State quarrel with the United Kingdom arising from the nonpayment of the land annuities was brought before the world economic conference in an attack on the practice of imposing punishment.

The United Kingdom-Irish Free State tariff war was brought to the notice of the conference by Senator Joseph Connolly, Free State Minister of Lands and Forests, in a blunt speech before the private meeting of the sub-committee on commercial policy.

After dealing with the causes of the quarrel as the Irish Free State saw them, Senator Connolly turned to the "punitive tariff" which Great Britain was imposing against Free State goods.

"You will appreciate," Senator Connolly told the sub-committee, "how foolish it would be for our delegates to go to Geneva and make towards a reduction of tariff principles according to 'normal conditions' in the interests of world economic peace without having this unique special punitive tariff policy, which is being applied by one of the great world powers, brought to your notice."

Marine Insurance Rates

Expect Lower Rates May Be Obained For Bay Route

Ottawa, Ont.—The report of the imperial shipping committee in which it found that the insurance rates on grain and machinery on ships sailing to Churchill could not be reduced this year, but the minimum rate was extended to apply to ships leaving Churchill late Oct. 7, instead of the previous limit of Sept. 30, was welcomed today by the department of marine.

The report appeared to be optimistic that lower rates might prevail in subsequent years if safety of the Hudson Bay route were demonstrated.

The report considered at length the ocean traffic into Churchill during the 1932 season when 10 cargo vessels made the passage through the ice belt to a record 100 days.

Passenger ships will go to Chicago, where he will advise preparations for the stratospheric balloon flight of his two brothers, Jean Picard, and Commander Etienne Sette of the United States navy.

Forest Fires In Ontario

Swept Over Fifteen Mile Stretch Near Fort William

Fort William, Ont.—Only partially checked by a sudden shift in the wind, a raging forest fire was defying efforts of 200 rangers and firefighters to bring it under control over a 15-mile stretch of cut-over timberlands, near Fort William, 83 miles west of here.

Lesser fires are burning at several places in the eastern section of the Thunder Bay district, causing considerable damage, and an available team in the area were drafted to fight them.

A Canadian National Railways bridge was destroyed near Hornepayne, temporarily cutting off communication between Long Lac and Port Arthur.

Brighter Outlook

Twenty Thousand Men Added To Industries In The East

Winnipeg, Man.—Saying that in May alone 20,000 men had been added to industries in the east and that in the 11 months since last July 100,000 more had been employed, Harry H. Stevens, Minister of Trade and Commerce, said trade and commerce in the Dominion was improving. "Trade situation is decidedly brighter," he said. "Cargo loading and passenger transportation both show marked improvement. Cattle are moving well and 40,000 head will be shipped to Britain this season."

Was Friend To Animals

New York.—The animals would be sad if they could understand. Harry Daniel Moran, head of the Humane Society of New York, who spent 16 years helping suffering beasts, is dead.

Canadians occupy a prominent place in the World Federation of Education Associations which is to hold its fifth Biennial Conference in Dublin, Ireland, this month. It will bring together outstanding educational leaders from forty or more countries with the object of cultivating and developing international good will and exchanging views on educational matters. The Dominion is represented by Harry Charlesworth (centre), Vancouver, B.C., as vice-president of the organization; Dr. E. A. Hardy (right), Toronto, as Treasurer, and Dr. D. D. MacDonald (left), Toronto, a member of the board of directors.
